Mr Federick R Dowsett Chief Monitoring and Enforcement Section Hazardous Waste Control Program Colorado Department of Health 4300 Cherry Creek Drive South Denver Colorado 80222 1530

Dear Mr Dowsett

This letter is being submitted in response to the Warning Letter dated January 28 1994 congregarding the accidental release of treated water from tank TK 207 from the Operable Unit—No 1 (OU 1) Interim Measure/Interim Remedial Action (IM/IRA) water treatment facility on August 26 1993. Your letter requested that the Department of Energy (DOE) submit documentation of compliance with the regulations which included the new procedures for effluent discharge which were put into place at this facility.

Enclosure 1 of this letter is being submitted as a documentation of compliance. This enclosure presents a data table which shows for each chemical constituent 1) the dates of effluent release. 2) the effluent tank I D 3) the appropriate ARAR from the OU 1 IM/IRA Decision Document and the sample results obtained before release. It was noted during internal RFO review of the procedures document that the ARAR is of the OU 1 IM/IRA Decision Document do not reflect the stream standards for Segment 5 as were adopted in February 1990 and March 1993. In the future DOE would like to initiate discussions with the agencies so that these ARAR is can become consistant with the adopted stream standards.

Enclosure 2 of this letter is the new operating procedure which has been applied for effluent discharge at the OU 1 IM/IRA water treatment facility since the accidental discharge of August 26 1993

So that DOE could more efficiently respond to the request by CDH the contents of these enclosures were discussed and verified with Jeff Swanson of CDH in a phone conversation on February 10 1994

Sincerely

Jessie Roberson
